

ED SERIES COMMERCIAL TRAILERS

"TKED" Series

The Perfect Extendable For Specialized Haulers

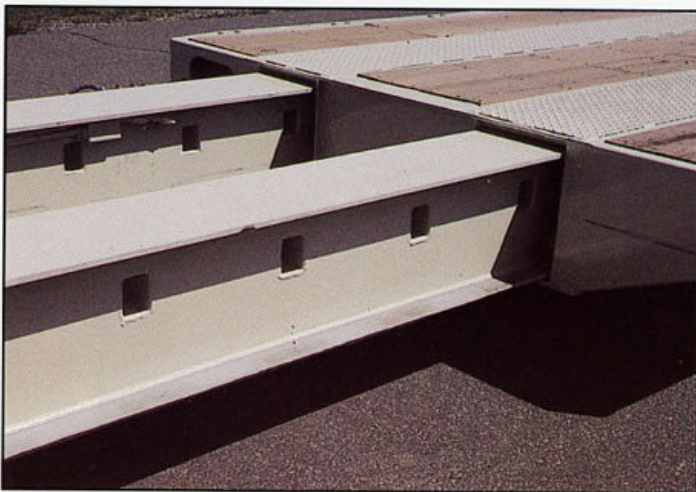

In today's highly competitive transportation industry, being versatile and efficient is the key to success.

Trail King's complete line of high capacity, lightweight extendable deck trailers give you the ability to haul loads that competitive models just can't handle.

Available in various lengths and in capacities from 50,000 to 100,000 lbs., the Trail King extendable line includes flats, single or double drops, and in addition to the fixed neck models, offers hydraulic and mechanical detachable models as well.

The Trail King double drop extendable line features a special cambered double box beam design that allows the crown in the beam to increase as the trailer extends, minimizing trailer sag. And with its unique 8-roller design, the deck extends and retracts smoothly and easily.

The TK70ED features air-ride suspension, 20" loaded deck height, and over 50' of deck space in the open deck position. The TK90ED also features air-ride suspension, 24" loaded deck height, and 50' of deck space in the open deck position.

Both the Trail King TK70ED and TK90ED feature a box beam construction minimizing trailer sag while maintaining low 20" and 24" loaded deck height.

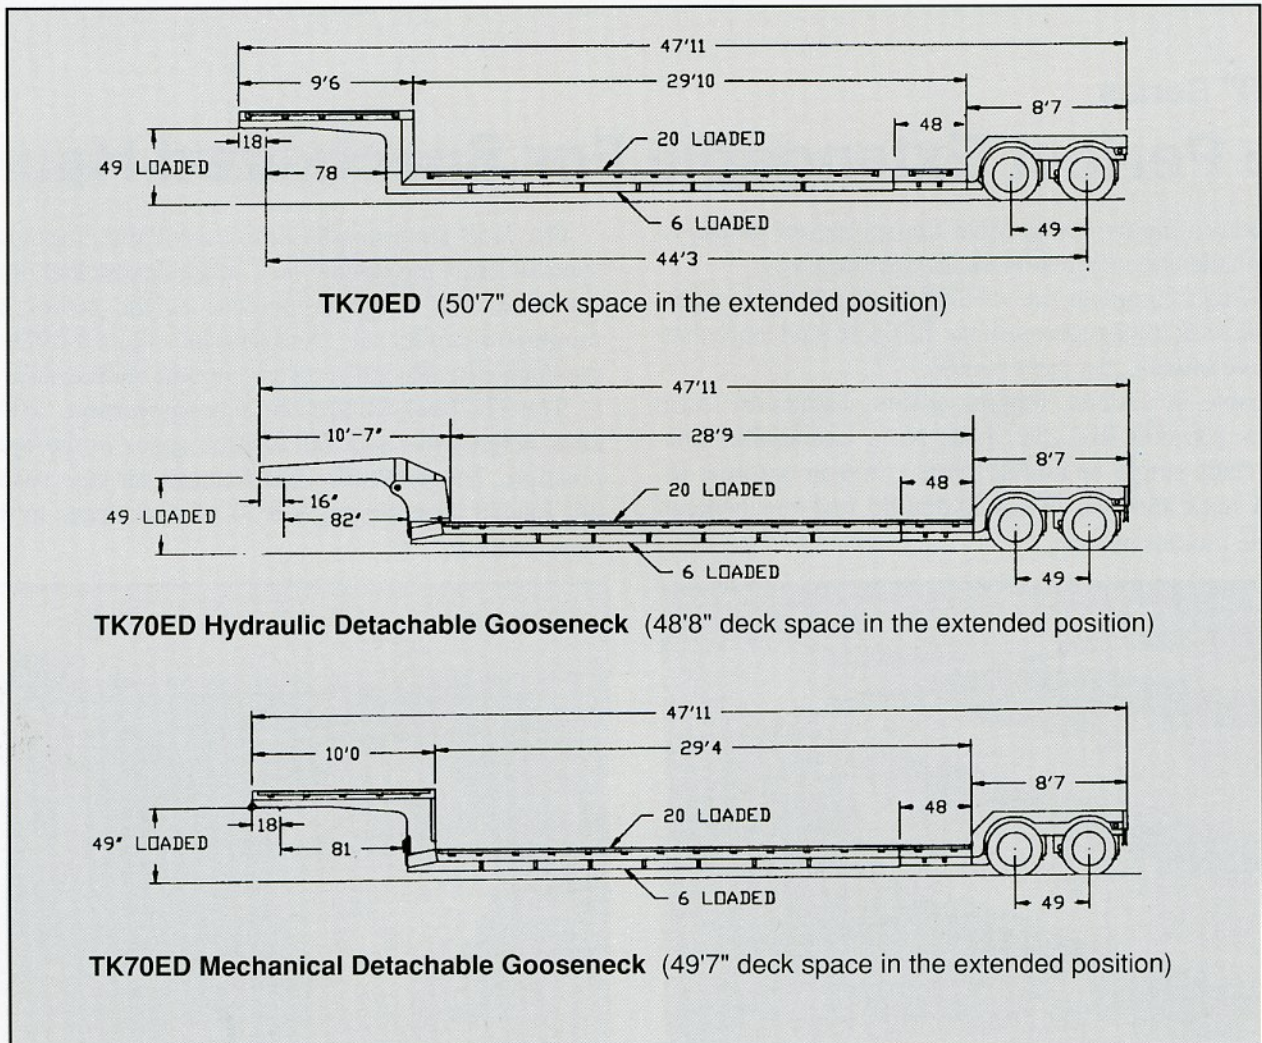

Optional covered flip axle is available for better utilization of rear deck space and increased scalability. Booster applications also available to assist in meeting multi-state maximum axle regulations.

A COMPLETE LINE FOR ALL YOUR HAULING NEEDS!

TRAIL KING EXTENDABLE TRAILERS

STANDARD EQUIPMENT (Double Drop Series)

22,500 lb. axles	100,00/80,000 PSI yield strength steel construction
Air-ride suspension	8" mill channel side rail (longeron)
